

Cincinnati Children's Common to Complex - Project ECHO: DEPRESSION

Depression Cohort begins May 10, 2018 – Register Today!
cchmc.cloud-cme.com/C2CDepression

Depression is **common** in children and adolescents; however, identification and treatment can be **complex**. *Common to Complex: Project ECHO cohort on Depression* provides an efficient way to learn what you need to know and practice how to do it, supported by psychiatrists and collaborating with peers. The goal is to improve the primary care provider's comfort when managing treatment of depression, and provide a network of resources to ensure patients receive the right care, in the right place, at the right time.

Opportunities to Gain Skills:

- Accessing Psychiatry Effectively
- Identifying and Responding to Risk of Harm
- Medication Matters – Challenges with dosing, interactions, and side effects
- Evidence-Based Therapies In and Out of the Office
- Complexity - Comorbid conditions, Age, Family motivation
- Facilitating Care Coordination

When:

- Every second Thursday of the month
- Beginning May 10, 2018
- 6:30pm
- Using a video conferencing platform on line

Featured Faculty:

Emily Harris, MD, MPH, FAAP

Dr. Harris is board certified in pediatrics, adult psychiatry, and child and adolescent psychiatry. She provides direct clinical care as a general pediatrician at CCHMC in the PPC and as an outpatient child and adolescent psychiatrist at the College Hill campus.
