

User Experience Guide for Exam Mode

Exam mode uses probes to create quizzes and exams that test knowledge only, in place of going through a full course. You'll see all the main question types that appear in the full adaptive course and be able to move back and forth between questions. You can go through all the probes or select those you'd like to review. You can select SUBMIT at any point. After you select SUBMIT, you'll be allowed to view the correct answers and feedback for each probe. You can restart the Exam as many times as you'd like.

Note: Exam mode is meant to be taken like the actual test so you don't see correct/incorrect answers until you review at the end – even though you can pause your progress at any time). If you want correct/incorrect answer and explanations, you will need to use practice mode.

Exam Mode

 A screenshot of the Rhapsode dashboard. The interface is primarily pink and purple. On the left, there is a 'SUSTAIN' section with a 'REFRESH' button and a card titled 'Introduction To Adaptive...'. In the center, there is an 'EXAM' tile with a pink header, titled 'Question Bank in Exam Mode', showing '0%' progress and 'Cincinnati Pediatric Hospital Medicine Doa...'. To its right is a 'LEARN' tile with a blue header, titled 'Full Videos and Slides', showing '0%' progress and '~1m' duration. Further right is another 'LEARN' tile with a blue header, titled 'Behavik', showing '0%' progress and 'Cincinnati'.	<p>Exam tiles are colored hot pink/purple.</p> <p>Click the tile to start a practice exam.</p>
 A screenshot of the 'Exam: Exam All Content' start-up screen. The header includes the 'Children's' logo and 'PROGRESS Exam All Content 345'. Below the header, there is a grey bar with the text 'ARE YOU READY TO START?'. In the center, there are two statistics: 'QUESTIONS 345' and 'ATTEMPTS ∞'. At the bottom, there are two buttons: 'BACK TO DASHBOARD' and 'START'.	<p>The Exam Start-Up Screen appears after you click the exam tile in Rhapsode LEARNER and before the actual exam begins. It shows the exam's conditions.</p> <p>You have unlimited attempts and up to 345 questions. There is no time limit.</p>

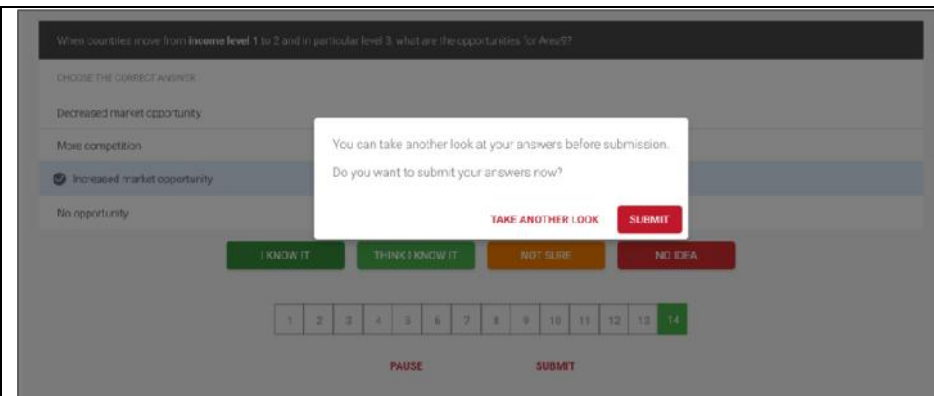

When you take an exam, the main interface is very similar to that of the adaptive learning modules, as you can see here.

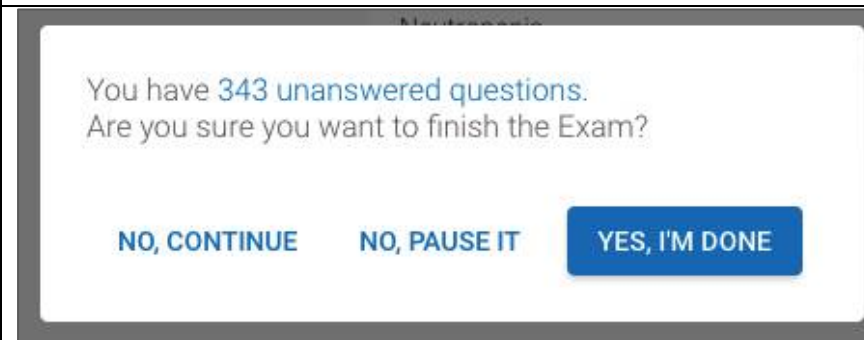

By clicking on the numbers in this area, you can navigate back and forth through all the probes. You can also PAUSE and come back.

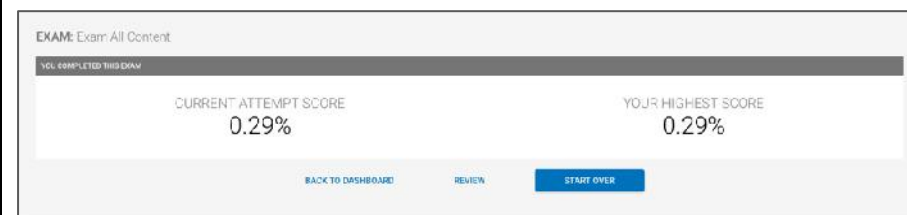

You can mark a probe by ticking this box. The probe will be highlighted in the navigation bar by a colored frame around the probe number. This might be useful if you are uncertain with your answer and you want to circle back for later inspection.

As soon as the last probe is answered, you will be asked if you want to SUBMIT.

If any questions remain unanswered at the time you click SUBMIT, the submission only takes effect after confirmation in this dialogue box. Be aware that once all questions have been answered clicking SUBMIT will end the exam.

Once you've submitted, you can **review** the correct answers and feedback.

The screenshot shows a web interface for a medical exam review. At the top left is the 'Children's' logo. The page title is 'Exam Review: Exam All Content'. A score indicator shows 'SCORE: Exam All Content 0 / 345'. On the left, there is a 'Coach' section with a profile picture and a 'Push ▶ for reading content about' button. The main content area displays a question: 'Which of the following statements about fever of unknown (FUO) origin is correct?'. Below the question, it says 'YOU SUGGESTED THIS QUESTION'. There are four 'Other Answer' options, each with a red bar indicating it is incorrect:

- It is rare; cases, fever resolves spontaneously
- The majority of patients with FUO have an underlying neoplastic diagnosis. The most common diagnosis is infectious, not neoplastic.
- History of exposures is not likely to help identify a diagnosis
- History of travel is not likely to help identify a diagnosis

 Below the options is a 'DETAILED FEEDBACK' section with text explaining that FUO is defined as a fever of >3 weeks' duration with no identified cause, and that in the majority of cases, no etiology is identified, and fever resolves on its own. It also lists differential diagnoses like infectious, inflammatory, and neoplastic. A 'Reference' section at the bottom lists a source: 'Antoon JW, Pottelack NM, Lohr JA. Pediatric Fever of Unknown Origin. Pediatr Rev. 2015;36(9):366-391. doi:10.1542/pr.36.9.366'. At the bottom of the main content area are 'CHALLENGE US' and 'END REVIEW' buttons. A navigation bar at the very bottom shows a 'PREV' button, a list of question numbers from 1 to 345 (with 9 highlighted), and a 'NEXT' button.

You can move back and forth through the questions to review correct answers feedback.

This close-up shows the navigation bar at the bottom of the exam interface. It features two buttons: 'CHALLENGE US' and 'END REVIEW'. Below these buttons is a horizontal list of question numbers from 15 to 345. The numbers 15, 16, 17, 18, 19, 20, 21, 22, 23, and 345 are in red, while the others are in grey. An ellipsis '...' is placed between 23 and 345. A blue 'NEXT' button is positioned to the right of the number list.

Once you've reviewed, you can **END REVIEW** and return to your dashboard or begin again.
