

## User Experience Guide for Practice Mode

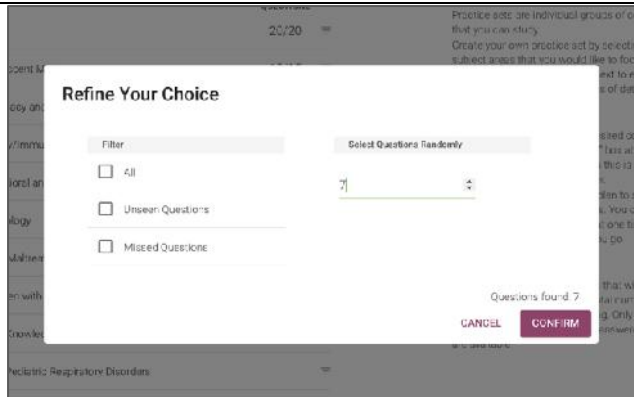

**Practice Mode** allows you to combine modules into one experience (leading with questions) called Practice Sets. The practice set mode also utilizes the adaptive engine. You can create multiple, custom practice sets with different configurations of modules. Please note that once you have included questions from a module in a practice set, they can only be accessed again by re-opening that practice set under the Sustain area on your Dashboard.

### Practice Set Experience

	<p>On your dashboard, you'll see a tile for Practice Sets. It is colored Grey. This feature will allow you to mix and match questions between modules. You can also take any module on its own.</p> <p>Select the tile to continue.</p>
	<p>Select the area that states Add Practice Set.</p>
	<p>This popup window will help you determine which modules/questions you will experience in a single practice set.</p> <p>Check each module you are interested in. You can also select the filter icon to reduce the number of questions (see next step).</p>

Each practice set needs a title.

Note: Once you have completed all the questions from one module, you can't include them in a new practice set, you'll have to return to the practice set you included them in.

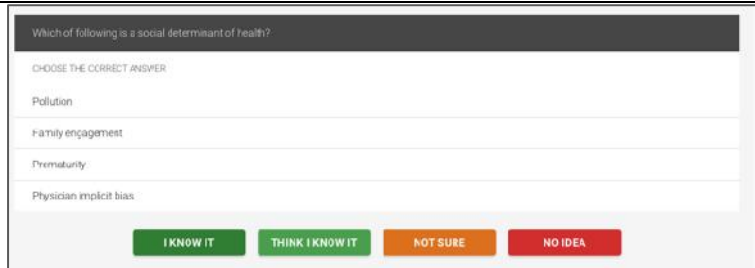

When select the filter icon, you'll be able to choose a subset of questions or any unseen questions from previous practice sets. When you are ready with your selections, hit CONFIRM and then CREATE PRACTICE SET.

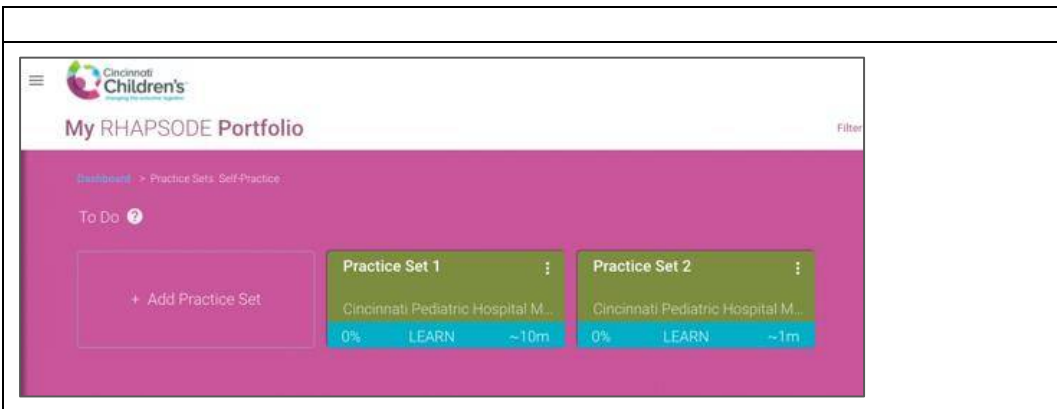

After you've created your practice set, a tile will appear on your sub-dashboard that shows any practice sets. You can return to the main dashboard by selecting Dashboard above the tiles.

You can enter that practice set by selecting the tile.

Once you enter, you'll be in an experience driven by the adaptive engine.

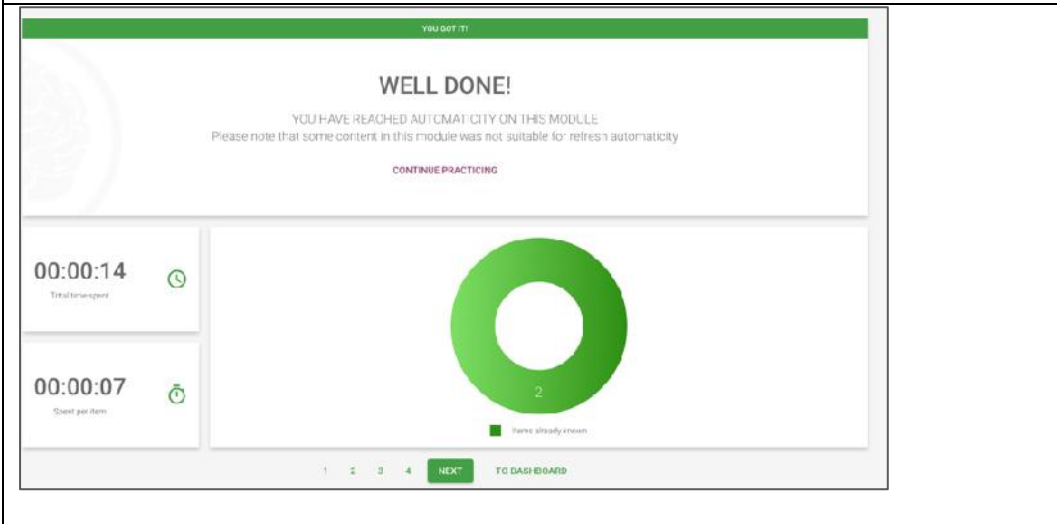

(See [User Experience Guide for Adaptive Mode](#))

If you create multiple practice sets, they will appear as separate tiles.

Once you've completed all questions within a practice set, it will move to the Sustain area.

You can select any tile in the Sustain area to practice the questions again.

You'll first be presented with questions, and after you finish them again, you can also keep practicing by selecting CONTINUE PRACTICING.
